SEW Eurodrive

SEW Eurodrive manufactures of a wide range of premium quality reduction geared motor units, AC frequency inverters and servo drive packages for a wide range of industries.

Typical applications include geared motors and speed controllers for materials handling and fluid handling machinery. We have solutions for everything from heavy mining, steel and lumber applications to high speed, high precision packaging machines. Innovative drive and control systems can be tailored for new builds and plant upgrades. Aseptic solutions include all-stainless steel geared motor units and multi-layer paint protection packages for harsh and hygienic environments.

Our range of gearboxes and motors meet the highest international requirements for efficiency and global representation ensures seamless service and support for exporters.

nzcontrols.co.nz

Founded in 1961, Rittal has grown to become the largest enclosure manufacturer in the world, a leader in climate control technology and a provider of complete data centre infrastructure. Six locations across Australia and New Zealand service a wide range of industries including:

- Food and Beverage Processing Plants
- Industrial Process Control Systems
- Mining, Oil and Gas Exploration and Processing
- Machine Tool and Equipment Manufacturing
- Data Centres
- Outdoor Signalling and Communication Systems
- LV Electrical Switchboards

With well over 10 000 products, Rittal has the largest range of industrial and IT solutions supplemented by a vast selection of accessories and modification capabilities. Rittal provides systems and products together with design, consultation, planning, project management and post sale service.

Rittal ANZ service and delivery centres in Sydney, Melbourne, Brisbane, Perth, Adelaide and Wellington. Our modification capabilities ensure the perfect fit solution no matter what your application. Rittal's German engineered, highest quality products are backed by a worldwide team of 10 000 committed staff, 10 high-tech production facilities and 63 international subsidiaries. Rittal is your local global provider of market leading technology. www.rittal.com/nz-en

HD Process NZ Ltd

HD Process NZ Ltd, specialises in hygienic processing equipment to meet all food, wine, honey and dairy industry needs. The range includes stainless steel valves, filters, pumps and tank equipment.

Currently the company has 5 full-time sales staff in New Zealand. It has been working with food production related companies in New Zealand for over 22 years. As well as assisting to specify off-the-shelf solutions HD process works with its customers to deliver bespoke solutions.

The off the shelf range typically includes food grade lobe, centrifugal and progressive cavity pumps, butterfly and ball valves, sanitary stainless steel filters, man-ways, tube in tube heat exchangers and a range of general tank equipment.

Please talk to one of our sales staff if you have an interest in getting technical expertise with your product range.

hdprocess.co.nz

GEA is present where you are - from Cape Reinga to Bluff. With process and equipment offerings from the farm to the table GEA has a wide range of technologies in its catalogue.

Within the Equipment business area we have pumps, valves, heat exchangers, cleaning equipment, product recovery systems, strainers/filters, homogenisers, separators/decanters and more.

These are supported in your plant by an After Sales team including locally held spares stock for all equipment and a skilled field service team.
