

Specialty equipment

▶ Scraped surface heat exchanger

- Ideal for thermal exchange of products with high viscosities and for products with particulates in suspension
- Rotating blades continuously clean the surface
- Products include; sauces, chocolate, yoghurts, pet food, coffee extracts and honey
- Features include ease of inspection, high degree of cleanability and aseptic version with flushed seals
- Modular design allows for multiple unit in-series

Tube-in-tube

Multi-tube

▶ Tube-in-tube heat exchangers

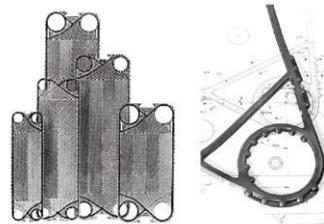

- Available as either single, tube-in-tube designs or multi-tube
- Ideal for thermal exchange of products having low or medium viscosities, even with particulates

Mobile plate and frame

▶ Plate and frame heat exchangers

- Specifically designed for dairy and food industries
- High thermal efficiency plate design
- Relatively small footprint
- Capacities from 200 l/h to 20,000 l/h

▶ Heat exchanger plates and gaskets

- Plates to suit most makes and models of PHE
- Customised frames to suit most plates for new machines
- Replacement gaskets to suit most leading brands of PHE including Alfa Laval, APV, Pasilac, Sondex, Schmidt, Fisher and Hisaka
- Available in a wide range of materials
- Competitive prices and short delivery times
