

Swienty Honeydryer

Art. No. 110950

Technical Data

Machine type:	Full automatic honey drying machine
Capacity:	1-2% water/300kg/hour with max 15°C cooling water.
Height:	180 cm
Electronics:	PLC control with touch panel
Power:	3x400V+N/50Hz, 13A
Power consumption:	15kW
Weight:	466 kg
Item#:	110950
Tariff code:	8422 3000
Packaging:	1 pcs. as a pallet (100cm x 120cm)

Swienty Honeydryer

High capacity vacuum honeydryer with full automatic operation. Almost any humidity can be reduced to the desired humidity you want to achieve. All parts that come into contact with honey are made of stainless steel or food approved rubber hoses. Operation is full-automatic, you only need to enter the desired final humidity percentage and the machine will do the rest for you.

All you need to do is place a tank or drum with wet honey and a second tank for dried honey next to the machine, connect a cool water supply (about 1m³ of 10°C per hour consumption) and power (16A supply). Optionally, this machine can be equipped with an integrated water cooling system. The machine has a small form factor and measures only 1.2x1.0x1.4 meters in size (LWH).

The system includes:

- high capacity heat exchanger.
- waterheater
- hot water pump
- two variable speed controlled gear pumps
- high capacity vacuum pump
- backflow valve for vacuum pump
- vacuum tank with level control and temperature gauge
- temperature controls at all critical points
- cool water tank
- automatic cool water intake (no clean water needed)
- automatic valves for intake and outflow etc.
