

# Labelling Machine

# Art. No. 110850

## Technical Data

Type of machine:	Labelling machine for selfadhesive lables on rolls
Capacity:	Max 4000 Labels / hour
Label length:	15-250 mm
Label width:	15-120 mm
Product height:	20-300 mm
Product diameter:	ø 20 - ø 150 mm
Power supply:	230 V
Power consumption:	400 W
Weight:	105 kg
Optional features:	Counter, printer, roll end warning, hex jar band
Item#:	110850
Tarif code:	8436 9900
Packaging:	1 pcs. shipped on wood framed pallet

### Labelling machine for cylindrical jars

This industrial labelling system is designed for cylindrical jars with up to 3 labels and lotprinting.

The self-adhesive labels from the label-spool are dispensed by the label dispenser and then smoothed on the jar by a special press-roll system.

The labelling system can be extended for many types of labelling jobs: Top or back labels, date/lot printing, seal-labels, special press-rolls for hexagonal jars etc.

These machines can be customized to fit labels onto almost any jar available. Customization is subject to additional charges.
