

## Electric lidfitter

Art. No. 110804

**Lidfitter**

Semi automatic lid-fitter.

The machine is developed for small to medium size beekeepers.

The basic idea of the machine is to help and prevent ligament damages, and other stress injuries from respective movements.

The lid-fitter machine is able to handle screw-on and twist-off functions. The machine is easy to use and control for one person.

The lids are placed loosely on the jars whereupon the machine holds the jar while tightening the lid. After the process, the machine starts over again.

The lidfitter machine is adjustable for different sizes of jars and lids. Minimum jar size  $\varnothing 40 \times H50$  mm to  $\varnothing 130 \times H150$  mm and the sizes of lids are between  $\varnothing 45-90$  mm.

The machine can handle lids and containers made of plastic, metal or glass.

**Technical Data**

Machine Type:	Semi automatic lid-fitter
Capacity:	up to 1000 lids/hr.
Jar size:	Between $\varnothing 40 \times H50$ mm to $\varnothing 130 \times H150$ mm
Lid size:	$\varnothing 45-\varnothing 90$ mm
Height of belt:	830 mm from floor to conveyor belt.
Electronics:	PLC control
Power supply:	90-264VAC 50/60Hz
Power consumption:	668W
Weight:	45 kg
Other:	Tools for other lid sizes available.
Item#:	110804
Tariff code:	8422 3000
Packaging:	1 pcs.
